

Bilaga 1

Definition av substans baserat på substansinformation från NPL.

Vid definition av substans görs inte skillnad mellan olika salter. Kombinationer av aktiva substanser definieras som ny substans förutom för vissa produkter med stort antal ingående substanser till exempel vacciner, mineralämnen, vitaminer och lösningar där istället ATC kod anges som substans.

Listan redovisar TLV:s nuvarande bedömning och kan komma att uppdateras.
